The hep-reference package∗

Adjustments of standard references, footnote, and citations

Jan Hajer†
2022/11/01

Abstract

The hep-reference package applies some light convenience modifications to the reference, citation and footnote macros after loading standard classes improving on the default \LaTeX behaviour.

1 Introduction

The hyperref package is loaded and the links are hidden.

\texttt{\ref} References are also adjusted to not start on a new line.

\texttt{\eqref} Footnotes are adjusted to swallow white space before the footnote mark and at the beginning of the footnote text. Additionally the reference back to the text where they are called from.

References

∗This document corresponds to hep-reference v1.1.
